PROFESSIONAL EXPERIENCE

ReliaQuest | Software Engineer (promoted from Associate in 9 months) | July 2025 – October 2026

- **Front-End Architecture:** Led architecture and development of major features for a desktop-based platform application using React, TypeScript, and GraphQL APIs, from concept through production. Built data-heavy screens with tables, filters, and complex state.
- **UX & Design Systems:** Worked daily with designers to build interfaces that follow the corporate design system, making hands-on decisions on layout, interaction, and flow.
- **Full-Stack Delivery:** Integrated a conversational interface with an existing platform feature: front-end delivery plus supporting back-end (REST and GraphQL) and SQL work.
- **Squad Lead & Releases:** Took over as squad lead mid-project, owning in-flight work through release and partnering with the PM and associate engineers. Delivered 4 major platform releases, 100% on time, on timelines from 1 to 6 months.
- **AI-Native Workflow:** Built an internal Claude-based workflow pairing a vectorized, searchable knowledge base with a dispatch system that automates Jira stories, GitLab merge requests, and end-to-end tasks.
- **Ownership & Quality:** Owned customer-reported gaps in features I built, tracing issues to the root cause. Set technical standards and led code reviews to maintain production quality.

PROJECTS

Commit: Native iOS Task App | Personal Project, Solo Developer | 2026

- Built a native iPhone app in Swift, SwiftUI, and SwiftData with an interactive home-screen widget, local notifications, and calendar integration (EventKit), across 8,000+ lines of Swift.

Issue Tracker | Front-End Developer | 2025

- Built a responsive Angular dashboard and tracking interface with integrated UI components and performance optimization.

TECHNICAL SKILLS

Front-End & UX: React, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Angular, Jest, Design Systems, Figma, Frontend Architecture, Chrome DevTools.
Back-End & APIs: GraphQL, REST APIs, Spring Boot, Java, SQL, PostgreSQL, Python.
Mobile: Swift, SwiftUI, SwiftData, WidgetKit, EventKit, Xcode.
Process, Tools & AI: Agile/Scrum, Jira, Git/GitLab, SDLC, Claude (Agentic Workflows, Memory Systems), GitHub Copilot.

EDUCATION

Purdue University, West Lafayette, IN
B.S. Game Development, Web Programming & Design | Graduated Spring 2025
Academic Honor Roll: Spring 2023, Fall 2023
